## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-8 & 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyden et al. (US 6,234,447).

3. With respect to claim 1, referring to FIGS. 1-2 Boyden et al. disclose a device to remove a liner 10, lifting force, brace in the shape of a U, with descending left side 44a, descending right side 36a, and connecting arm 36b, an elongated screw 18 through the descending left side 44a, elongated screw handle 20, elongated screw threaded portion 18, right bracket 22, 32, 34, 35 through which the screw passes, a left bracket 24, 40, 42, 43, and left bracket nut 38.

4. With respect to claims 2 & 7, referring to FIGS. 1-2 Boyden et al. disclose a right bracket 22, 32, 34, 35 and left bracket 24, 40, 42, 43 each have an 'L' shape.

5. With respect to claim 3 & 8, referring to FIGS. 1-2 Boyden et al. disclose a brace further comprises attachment points as shown below. It is noted that a lifting force would be applied through these attachment points and could be applied manually.

6. With respect to claims 5 & 10, referring to FIGS. 1-2 Boyden et al. disclose an elongated screw 18 and right and left brackets 22, 32, 34, 35 & 24, 40, 42, 43 are made of metal.

7. With respect to claim 6, referring to FIGS. 1-2 Boyden et al. disclose a method for removing a liner a bucket wherein an elongated vice 10 comprising a brace having a right bracket 22, 32, 34, 35 and a left bracket 24, 40, 42, 43 connected by an elongated screw 18, 20 comprising the steps placing the elongated vice over a top of the bucket and the liner, positioning the right bracket 22, 32, 34, 35 and left bracket 24, 40, 42, 43 on opposite sides of a bucket, turning a handle 20, closing a vice 10 and causing right and left brackets to slide underneath a liner lip, providing a lifting force underneath a brace, and lifting a vice and liner so that a liner is lifted out of a bucket, wherein a left bracket 24, 40, 42, 43, includes a nut 38 that is secured to a central portion of a left bracket and a elongated screw threaded end 18 passes through a nut.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3652

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 4 & 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyden et al. (US 6,234,447) in view of Okada (US 5,020,963). Boyden et al. disclose a lifting device raised by a lifting force but does not disclose a forklift or crane types of lifting force. Referring to FIGS. 1-9 Okada discloses a fork lift to lift a lifting device 1 through attachment points 11. Okada teaches that a forklift facilitates transport of large containers such as drums by removable lifting devices. Col. 1, Ins. 10-25. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the lifting force of Boyden et al. to apply a lifting force delivered by a forklift, as per the teachings of Okada, to facilitate the transport by removable lifting devices of large containers such as drums.

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
